

## Smart Monitor Announces New Medication Reminder Feature for SmartWatch™ Premium

SAN JOSE, Calif., June 19, 2013 -- Smart Monitor, Corp., an innovative solutions provider for the healthcare and wellness markets, announced today that a new feature, Medication Reminders, is now available for its [SmartWatch™](#) Premium product. The new feature, which allows users to create and schedule customized alerts for medications, greatly enhances SmartWatch's value as a wellness and [safety monitoring solution](#) for users and their family members or caregivers.

Medication Reminders are available at no additional charge for all current and future SmartWatch Premium users. The feature allows users to:

- **Set reminders** for different medications
- **Schedule reminders** for specific times, on a recurring or one-time basis
- **Choose duration** for reminder alert, from 1-300 seconds. The alert stays on for this duration or until the user acknowledges it.

At the time of a scheduled reminder, the SmartWatch vibrates and the face lights up to alert the wearer. The medication name also appears on the SmartWatch display. The status of all acknowledged and unacknowledged reminders are logged and stored in the SmartWatch event list, which allows caregivers and family members to help the user stay current on their medications.

"Medication Reminders are yet another feature that provides safety and peace-of-mind for SmartWatch users, their loved ones, physicians and other caregivers," said Anoo Nathan, CEO of Smart Monitor. "Many SmartWatch users have requested the Medication Reminders feature, and we're thrilled to now offer it to all current and future SmartWatch Premium users!"

SmartWatch is a patent-protected, intelligent wristwatch that continuously monitors movements and alerts upon the onset of repetitive shaking motion. Bluetooth connectivity enables SmartWatch to automatically send text message and phone call alerts to designated family members and caregivers using a connected smartphone. Users can also summon help with a simple push of a "Help" button. SmartWatch is portable, non-invasive and can be used by adults and children as they go about their day-to-day activities.

### About Smart Monitor

Smart Monitor provides monitoring and tracking solutions for people with chronic health conditions. Founded in 2009 and headquartered in San Jose, CA, Smart Monitor fuses motion sensor, mobile and cloud technologies with big-data analytics in a seamless environment. Smart Monitor's patent-protected solutions foster autonomy and enhance safety for people with chronic health conditions, while offering significant peace-of-mind to their families and care providers.
